(54) TRANSMISSION TYPE LIQUID CRYSTAL DISPLAY DEVICE AND PICTURE PROCESSING METHOD

(57)Abstract:

PROBLEM TO BE SOLVED: To solve the problem that when the picture exchange is performed between personal computers, pictures to be displayed on both computers can be made isochromatic under a certain situation by using a color management system, but it is difficult to keep the isochromatic feelings of both pictures to be maintained in accordance with degradation of the devices associated with a secular change because there is a difference in use times of liquid crystal display devices and individual characteristics of the computers.

SOLUTION: In this transmission type liquid crystal display device, either a luminance correction to be included at least in RGB signals or a chromaticity

correction to be included at least in the RGB signals is performed by the value measured with a photosensor 2.

LEGAL STATUS

[Date of request for examination] 07.02.2003

[Date of sending the examiner's decision of rejection] 22.02.2005

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
